SUMMARY

CSE graduate from North South University (expected Dec 2026) who builds evaluation-shaped work: original eval cases, multi-step reasoning prompts, rubric scoring, and documented research trails across coding, systems, finance, and clinical epidemiology.

Designs challenging Q&A pairs, triangulates primary sources, scores fluent model-style answers with explicit rubrics, and raises difficulty when probes score ≥4/5 without synthesis — with a logged DRAFT → probe → final item trail. Incorporates reviewer feedback into revisions and keeps gold keys guideline-aligned.

EDUCATION

B.Sc. in Computer Science & Engineering — North South University

2021 – Dec 2026 (expected) · Dhaka, Bangladesh

- Coursework in algorithms, AI, software engineering, and systems — applied through production-shaped open-source projects.
- Independent research habit: flagship repos ship architecture docs, tests, CI, and honest metrics.

EXPERIENCE

Builder · Evaluator · Sole contributor — Independent AI / Systems Portfolio

2024 – Present

- Shipped 20+ public repositories: LLM evaluation harnesses, agent workflows, NL→SQL safety, data quality, and LoRA fine-tuning.
- Wrote batch eval pipelines with JSONL test cases, pluggable validators, rubric dimensions (accuracy / clarity / helpfulness), and Markdown + JSON reports.
- Built multi-agent incident workflows with an evaluation harness scoring triage accuracy, remediation quality, and resolution rate.
- Authored a multi-domain Frontier Eval Sample Pack (ML, HTTP, Postgres, Basel LCR finance, diagnostic PPV) with capability probes, difficulty raises, and a two-round reviewer revision trail.

Director of Logistics — ICMA NSU Student Chapter

Mar 2023 – Present

- Owned event logistics and delivery reliability — planning, coordination, and accountable execution under deadlines.

SELECTED PROJECTS (UPDATED OCTOBER 2026)

LLM Eval Harness — https://github.com/simanto4321/llm-eval-harness

- Batch evaluation package: JSONL cases, category validators, multi-dimension rubric scoring, offline reproducible reports.

LLM Eval Starter — https://github.com/simanto4321/llm-eval-starter

- Mock LLM coding comparison with AST validation, complexity checks, and automated Markdown evaluation reports.

AgentOps Desk — https://github.com/simanto4321/agentops-desk

- Multi-agent incident workflow with human approval gate, deterministic replay, and scenario evaluation harness.

QueryPilot — https://github.com/simanto4321/querypilot

- Safe NL→SQL analytics agent with sqlglot validation, governance guards, and execution traces.

LLM Fine-Tune (LoRA) — https://github.com/simanto4321/llm-finetune-lora

- DistilBERT + LoRA with baseline comparison, reproducibility manifests, and MODEL_CARD.md.

Contract Intelligence Reviewer — https://github.com/simanto4321/claude-contract-intelligence

- Explainable contract-risk rules with reviewer-inspectable rationales (FastAPI + dashboard).

GAPS CLOSED FOR MICRO1 FIT

- **Domain breadth:** Added finance (Basel LCR) and clinical epidemiology (PPV) items with primary-source triangulation.
- **Difficulty iteration:** DRAFT → capability probe → raised finals; scripts/probe-difficulty.py.
- **Reviewer loops:** Two-round revision trail with feedback → actions → guideline alignment.

SKILLS

- **Evaluation:** Rubric scoring; multi-step synthesis design; source triangulation; multi-domain items; capability probes & difficulty logs; reviewer revision trails; agent scenario harnesses; AST validators
- **Technical:** Python; TypeScript; FastAPI; React; PostgreSQL; LoRA/PEFT; sqlglot; Docker · CI
- **Work style:** Written precision (English); attention to detail; self-direction; analytical synthesis; guideline adherence

WHY MICRO1

- Scope match: original hard Q&A, research with citations, multi-step reasoning, probe-and-raise difficulty, and refine from reviewer feedback.
- Domain range beyond coding: finance (Basel LCR) and clinical epidemiology (PPV) beside ML/systems tasks.
- Recent grad with reproducible eval tooling (llm-eval-harness) plus documented process discipline — ready for contractor guidelines.

Work sample: Frontier Eval Sample Pack (multi-domain Q&A, probes, reviewer trail) available with this application package.
